The game begins with a login screen. The user can login with a username (if the user does not  
enter any name the game is played as a guest).

The user will be shown a word with some characters blanked and the user has to guess the correct word. The user gets 5 chances to guess the correct word failing which they have to start from first level of the game again. User needs to complete 5 words to reach the next level (level 2). For every incorrect letter one letter of the word WRONG is displayed on the screen. The user can choose to get hints.. For each correct guess the score is updated and the highest score so far in the game irrespective of the level is saved. User also has the option to quit the game.

HINT

Level 1

QUIT

Dig out d word:

W \_ X

Enter your Guess:
